Typically, a fossil forms when:

- An organism dies and is buried in sediment
- Sediments build in layers, eventually becoming sedimentary rock
- Minerals replace or fill in pores in bones or other hard parts

Unit 7 (Chapter 14) The
History of Life Section

1: Fossil Evidence of
Change Learning

Goals: • Describe the
typical sequence of
events of fossilization

• Compare techniques
for dating fossils

• Identify and describe
the major events of
Earth's history using
the geologic time
scale.
