The ping command first sends an echo request packet to the address given in the ping command, then waits for a reply. The ping is successful only if the destination is able to provide an "echo reply" back to the source within a predetermined time called a timeout. The default value of this timeout is two seconds on Cisco routers.

cisco Ccna-diagnostic Commands Study Guide

The DHCP service allows hosts to automatically obtain their IP configuration from the DHCP server. The DHCP service is available on Cisco switches. This means, if you have a Cisco switch in your network, you can also use it as a DHCP server. The following table lists the commands that are required to configure a switch to act as a DHCP server.

How to Configure DHCP Server on Cisco Switches

This command assigns the default gateway to clients of this DHCP pool. dns-server 192.168.1.2: This command sets a primary DNS server for the clients. option 150 ip 192.168.1.3: This command provides the IP address of the TFTP server to the clients. network 192.168.1.0 255.255.255.0: This
