In addition to thinking like a nurse using the skill of clinical reasoning, performing a physical assessment with excellence and attention to detail can make the difference between rescue and failure to rescue when a patient complication begins to develop.

## **Practical "Pearls" to Strengthen Nursing Assessment Skills ...**

Being the second most common neurodegenerative disease, Parkinson's disease (PD) can be symptomatically treated, although, unfortunately, it cannot be cured yet. Moreover, diagnosing and assessing PD patients is a complex process, requiring continuous monitoring. In this vein, the design, development, and validation of innovative assessment tools may be helpful in the management of patients ...
