Diverse prokaryotes produce gene transfer agents (GTAs), which are bacteriophage-like particles that exclusively package pieces of the producing cell's genome and transfer them to other cells. There are clear evolutionary connections between GTAs and phages, but GTAs have properties that lead us to suggest they are more than simply defective phages and instead provide a selective advantage for ...

Because evolution follows time, evolution is historical. And chance played an important role in evolutionary history, as already noted by Darwin (1859). This is why I often mention three words—chance, finiteness, and history—in my talks and books as well as the title for this perspective. Saitou is using "evolution" in two different senses.
