## **review ...**

August 15, 2016 - Patient empowerment is all too often seen as a characteristic an individual does or does not possess, similar to being funny or not. Engagement and the ability to take charge of one's health is a personality trait, many providers believe, and not necessarily a skill that can be taught or learned.

## **How Can Providers Drive Patient Empowerment in Healthcare?**

Empowerment of patients is often an explicit goal of various information and communications technology (ICT) (electronic, digital) interventions where the patients themselves use ICT tools via the internet. Although several models of empowerment exist, a comprehensive and pragmatic framework is lacking for the development of such interventions.
