Network Flows and Linear Programming 16.1 The Steepest Ascent Hill Climbing Algorithm We have all experienced that climbing a hill can take a long time if you wind back and forth barely increasing your height at all. In contrast, you get there much faster if energetically you head straight up the hill.

Network Flows and Linear Programming

Formulating and solving network problems via linear programming is called network flow programming. Any network flow problem can be cast as a minimum-cost network flow program. A min-cost network flow program has the following characteristics.
