If one is the loneliest number, 50 is the most intimidating for HR teams at small businesses. Once your headcount passes this threshold, you effectively trigger an avalanche of new reporting and compliance requirements. When startups make it "over the hill," fledgling HR teams come of age. Here are some of the key things to be aware of.

HR Compliance's Magic Number: 50 Employees

Clarification of the magic square governing human civilization? As noted above, having framed 1.5 as a "magic number", there is a case for a speculative focus on one of the most fundamental magic numbers as it features in the simplest magic square as a magic constant-- namely 15. This has the potential merit of indicating how the disparate domains governed by 1.5 may be interrelated.

Humanity's Magic Number as 1.5?

Countless psychological experiments have shown that, on average, the longest sequence a normal person can recall on the fly contains about seven items. This limit, which psychologists dubbed the "magical number seven" when they discovered it in the 1950s, is the typical capacity of what's called the brain's working memory.

It is for Intel, which uses little endian byte ordering, so the magic number is 49 49 2A 00. MM is for Motorola, which uses big endian byte ordering, so the magic number is 4D 4D 00 2A. Unicode text files encoded in UTF-16 often start with the Byte Order Mark to detect endianness (FE FF for big endian and FF FE for little endian).

In 2018, an Ernst & Young (EY) study examined the costs associated with not using employee self-service technology for HR-related tasks. The result, averaged over dozens of key tasks: \$4.39 per single entry of data. More recently, the same organization ran the numbers again. As of 2019, the new average cost of manual HR data entry comes to \$4.51.
