INVERTER - MITSUBISHI ELECTRIC Global Website

Hello, I am starting on a task where I need to control two servos of type VPL-B0633T-PK14A with associated controllers of type 2198-H008-ERS2. The servos are setup mechanically so they need to be synchronized at all times, thus I need to find a code design that matches this requirement. Is there an easy way to synchronize two servos?
