pgRouting: A PRACTICAL GUIDE now on sale - BostonGIS

pgRouting is an extension of PostGIS1 and PostgreSQL2 geospatial database and adds routing and other network analysis functionality. A predecessor of pgRouting – pgDijkstra, written by Sylvain Pasche from Camptocamp3, was later extended by Orkney4 and renamed to pgRouting. The project is now supported and maintained by

pgRouting Manual

The first thing we need to do is create a database and load pgRouting in the database. Typically you will create a database for each project. Once you have a database to work in, you can load your data and build your application in that database. This makes it easy to move your project later if you want to say a
