From fabrication to distribution, the 'scale-up' process helps pharmaceutical companies to meet consumer demand. A necessary component for company growth, the process typically increases manufacture from the laboratory to the pilot plant, and ultimately the intended production scale. Throughout each phase, pharmaceutical expertise is required to ensure compliance, safety and product consistency.

Scale-Up Challenges for Pharmaceutical Technology Graduates

- Scale up - Commercial batches - Site transfer (various possibilities) TOT defined as "a logical procedure that controls the transfer of any process together with its documentation and professional expertise between development and manufacture or between manufacturing sites". 1.1 - 1.2
