In his work *Physics*, Aristotle intended to establish general principles of change that govern all natural bodies, both living and inanimate, celestial and terrestrial - including all motion, quantitative change, qualitative change, and substantial change. To Aristotle, 'physics' was a broad field that included subjects that would now be called the philosophy of mind,

The inclusion of Aristotle's Physics in university programs was not, therefore, just a matter of academic curiosity. Naturalism, however, as opposed to a sacral vision of the world, was penetrating all realms: spirituality, social customs, and political conduct. About 1270, Jean de Meun, a French poet of the new...
