Scania Fault Code 113 - as1.occupy-saarland.de

The same fault is still there: Unknown fault! Here is what I have found: the original fault is nothing to do with the module itself, it's actually one of the EBS wheel speed sensors that is faulty. From what I can gather, the module sees the sensor as either open or short circuit and decides that, because the sensor is faulty, it can't correctly control the braking on that wheel.
