NEWater is a Singaporean success story and the pillar of the nation's water sustainability. NEWater is high-grade reclaimed water produced from treated used water that is further purified using advanced membrane technologies (microfiltration, RO and ultraviolet disinfection), making the water ultra-clean and safe to drink.

our sustainable water supply. Since 2011, the water catchment area has increased from half to two-thirds of Singapore's land surface with the completion of the Marina, Punggol and Serangoon Reservoir.

### **PUB Singapore Water Story**

This book describes the journey of Singapore's development and the fundamental role that water has had in shaping it. What makes this case so unique is that the quest for self-sufficiency in terms of water availability in a fast-changing urban context has been crucial to the way development policies and agendas have been planned throughout the years.

## **Story: Sustainable ...**

Over the decades, PUB, Singapore's national water agency, has created a sustainable supply from four sources: water from local catchment, imported water, high-grade reclaimed water (known as NEWater) and desalinated water. Together, these four sources, termed the "Four National Taps", have come a long way in helping Singapore meet its water needs.

## **Four Taps: The Story of Singapore Water - BiblioAsia**

Sustainable water management has high priority for the Singaporean government and the treatment of processed and waste water (NEWater) as well as the treatment of drinking water from seawater are the main topics. Sustainable water management is of enormous importance for Singapore's future.

Water demand across the country is currently about 430 million gallons a day and is expected to more than double by 2060. PUB, Singapore's National Water Agency, continues to ensure water sustainability, guided by three key strategies: To collect every drop of water. To reuse water endlessly. To desalinate more water.
