Software documentation is written text or illustration that accompanies computer software or is embedded in the source code. The documentation either explains how the software operates or how to use it, and may mean different things to people in different roles. Documentation is an important part of software engineering. Types of documentation ...

Software documentation - Wikipedia

Markdown Desktop Editors. Markdown is probably the most widespread form of writing software documentation. It is a lightweight markup language that can easily be converted into HTML or other formats. What makes markdown one of the top choices is the fact that you can use almost any plain text editor to create markdown files.

15+ Software Documentation Tools That Will Save the Day ...

Writing Good Documents Before agile software development became popular, we spent considerable amount of time for writing long documents that were not read by anyone after we finished them. It was quite common that a software project had a lot of documentation, but most of them were useless because they were hopelessly outdated.
