I've been racing jr dragster for the past year and I have an animal engine on my kids car that I bought from a local Briggs dealer. When I bought it I asked him about the difference between the LO206 and animal. He didn't seem to know and I struggled to find a definitive info on if there is a difference or not. They are labeled differently so I would assume there is some internal differences ...

Difference between the LO206 and the animal. - Let's Chat ...

There are several options for this. Briggs and Stratton makes the Animal for the kart racing world. This comes with a 22mm slide valve carb very much similar to the Mikuni carbs found on big sleds. These are easy to adjust for jetting changes. Tiltson also makes a wide range of performance carbs for small engines.

4 Cycle Central

JRPW Race Prepared LO206. This engine gets the JRPW treatment. We expertly perform the valve job, check and set the carb, set the valve lash to our specs, bolt on all the goodies and dyno test and tune. This engine is 100% legal, but we take full advantage of tolerances and tuning to make big gains over factory stock. Ready to bolt on minus clutch. If a colored slide is required for your ...
