### Economics and the Environment, 9th Edition | Wiley

Central to environmental economics is the concept of market failure. Market failure means that markets fail to allocate resources efficiently. As stated by Hanley, Shogren, and White (2007): "A market failure occurs when the market does not allocate scarce resources to generate the greatest social welfare. A wedge exists between what a private person does given market prices and what society ...

### Environmental economics - Wikipedia

The economic environment refers to all the economic factors that affect commercial and consumer behavior. The economic environment consists of all the external factors in the immediate marketplace and the broader economy. These factors can influence a business, i.e., how it operates and how successful it might become.
