Net horsepower more closely correlates with the power the operator will experience when using a Honda engine powered product. The power rating of the engines indicated in this document measures the net power output at 3600 rpm (7000 rpm for model GXH50, GXV50, GX 25 and GX 35) and net torque at 2500 rpm, as tested on a production engine. Mass production engines may vary from this value.
