The Range Rover was originally powered by various Rover V8 engines and diesel engines. Originally, the Range Rover was fitted with a detuned 130 hp (97 kW) version of the Buick-derived Rover V8 engine. In 1984, the engine was fitted with Lucas fuel injection, boosting power to 155 hp (116 kW).

## **Range Rover - Wikipedia**

Before 1994, the Discovery was available with either the 2.5-litre 200 Tdi engine or the 3.5-litre Rover V8. Early V8 engines used a twin SU carburettor system, switching to Lucas 14CUX fuel injection in 1990. A 2.0-litre petrol engine from the Rover stable was briefly available in a model known as the 2.0-litre Mpi 14. This was intended to attract fleet managers, since UK (and Italian) tax laws benefitted vehicles under 2.0 litres.
